

Technical drawing of a wooden bench, showing three views: a side elevation, a front elevation, and a plan view.

Side Elevation (Top View): Shows the bench's profile. The total length is L . The seat height is 320. The backrest is composed of multiple slats, with labels $U1$, $U3$, and $U4$ indicating specific slats. The backrest height is 1520. The bench is supported by four legs, with labels A , B , C , and D indicating the leg positions. The distance between the first and second leg is 550, and the distance between the second and third leg is 1000.

Front Elevation (Middle View): Shows the bench's front. The total width is $L1$. The backrest width is 1252. The seat width is 950. The backrest is composed of multiple slats, with labels $G1$ and $G2$ indicating specific slats. The backrest height is 1520. The bench is supported by four legs, with labels A , B , C , and D indicating the leg positions. The distance between the first and second leg is 550, and the distance between the second and third leg is 1000.

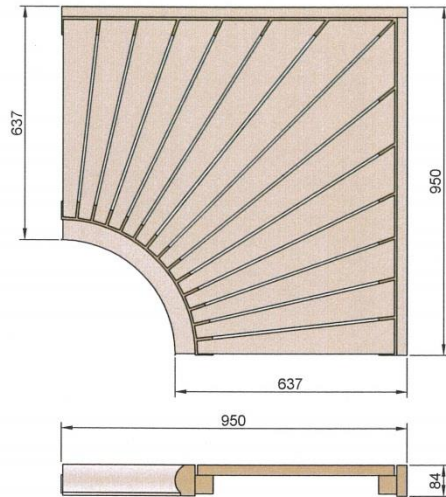

Plan View (Bottom View): Shows the bench's top. The total length is L . The backrest length is 1252. The seat length is 950. The backrest is composed of multiple slats, with labels $S1$ and $S2$ indicating specific slats. The backrest height is 1520. The bench is supported by four legs, with labels A , B , C , and D indicating the leg positions. The distance between the first and second leg is 550, and the distance between the second and third leg is 1000.
